

ANWI Intelligence Brief

Africa Next Workforce Index — Comprehensive Platform Summary

Generated: 2026-07-01 | Data as of: 2026-07-01
Classification: Open — Redistribution permitted with full attribution

1. Platform Coverage at a Glance

20 COUNTRIES ASSESSED	6 PILLARS	18 INDICATORS	349M YOUTH UNDER 25
59 PILOT AVERAGE	8 STRONG CONVERTERS		

The ANWI platform measures youth-to-workforce conversion across a 20-country pilot cohort, weighted pillars: education pipeline, entry-level work & AI exposure, institutional GenZ readiness, infrastructure, policy participation, and cross-border talent flow.

2. Youth Conversion Landscape

8 countries score "e60 (strong converters). 12 are emerging (45–59). 0 remain structurally constrained. Conversion capacity is uneven — digital skills infrastructure and entry-level hiring pathways differ sharply between leaders and laggards.

Regional Conversion Average

Region	Countries	Avg Score	Youth Share
East Africa	6	62	30%
West Africa	4	60	28%
North Africa	4	59	16%
Southern Africa	4	56	12%
Central Africa	2	50	15%

Top 5 Pilot Leaders by ANWI Score

#	Country	Score	Highlight
1	Rwanda	71/100	Highest pilot score — strong institutional coordination on youth skills
2	Mauritius	69/100	Highest connectivity and skills infrastructure in the pilot cohort
3	Kenya	68/100	Strongest digital skills bootcamp density in East Africa
4	South Africa	66/100	Mature policy frameworks but youth unemployment remains structurally high
5	Ghana	64/100	Stable democratic governance supports youth policy continuity

3. Pilot Cohort — Full ANWI Assessment

All 20 pilot countries assessed using the complete ANWI methodology (6 pillars, 18 indicators). Scores are normalized 0–100. Pillar abbreviations: Edu, Entry, GenZ, Skills, Policy, Mobility.

#	Country	ANWI	Edu	Entry	GenZ	Skills	Policy	Mobility
1	Rwanda	71	74	68	72	75	73	64
2	Mauritius	69	72	67	70	74	68	71
3	Kenya	68	72	71	65	78	62	70
4	South Africa	66	64	63	62	71	68	67
5	Ghana	64	66	60	63	67	65	62
6	Morocco	63	65	61	60	66	64	62
7	Nigeria	61	58	64	59	66	55	63
8	Tunisia	60	68	55	58	62	59	57
9	Egypt	59	62	57	56	63	60	55
10	Senegal	58	60	55	57	60	59	56
11	Botswana	58	62	54	57	60	61	55
12	Uganda	57	58	56	55	60	58	54
13	Côte d'Ivoire	56	57	54	55	58	57	55
14	Algeria	55	58	50	53	56	57	50
15	Tanzania	54	56	50	52	53	57	54
16	Cameroon	53	54	51	52	54	55	52
17	Ethiopia	52	54	48	50	51	55	52
18	Angola	50	48	47	49	51	53	50
19	Mozambique	49	50	46	48	47	52	50
20	Democratic Republic of the Congo	47	46	44	45	48	50	48

Rwanda leads with 71/100. The gap between pil conversion capacity — skills infrastructure and e

4. Continental Pillar Averages

Pillar	Weight	Pilot Avg
Education-to-Economy Pipeline	20%	60
Entry-Level Work & AI Exposure	18%	56
Institutional GenZ Readiness	16%	57
Digital & AI Skills Infrastructure	18%	61
Policy & Economic Participation	14%	59
Cross-Border Talent Flow	14%	57

5. Skills & Conversion Spotlight

Digital skills infrastructure shows the widest score spread of any pillar. Kenya leads on skills infrastructure (78/100). Bootcamp density, youth connectivity, and AI literacy programs concentrate in urban hubs while youth population growth continues continent-wide.

6. Intelligence Tools Overview

Tool	Coverage	Description
Country Compare	20 countries	Side-by-side pillar scores for up to four pilot countries
Executive Summary	Live	Headline intelligence, regional breakdown, full assessment table
Methodology	6 pillars	Scoring framework, indicators, limitations, and data sources
Executive Brief	PDF	This document — downloadable intelligence summary
Methodology Report	PDF	Full methodology paper with detailed framework

7. Strategic Implications

- Governments: Move beyond enrollment metrics to track graduate employment linkage, internship density, and AI literacy availability.
- Employers: Entry-level role design and GenZ-ready management are competitive differentiators where youth supply exceeds absorption.
- Educators: TVET alignment and bootcamp-to-employer pipelines are highest-leverage interventions in constrained markets.
- Investors: Digital skills infrastructure investment yields measurable conversion gains; policy-only interventions show limited impact alone.

8. Methodology & Data Sources

All data is drawn from the ANWI platform pilot databases, aggregating official government publications, ILO, UNESCO, World Bank, African Union research, and ANWI expert panel review. The methodology is structured around 6 pillars and 18 indicators per country. Full documentation: anwi.vercel.app/methodology
